Assignment 2

```python
import random
def detect(humidity,farenheitr):
    if(h>40 and (f>=80)):
        print("Alarm detected")

h = random.randint(20,100)
print("Humidity(%) - ",h)
f= random.randint(40,100)
print("Temperature(F) - ",f)
detect(h,f)
```
